DYNO-TAB
Fuel Stabilizer

Control No.
05017-US-2

FUEL STABILIZER TABLETS

Today's fuel actually degrades faster than older generation fuels. That calls for an industrial grade fuel stabilizer to provide the real protection you need.

Dyno-tab® Fuel Stabilizer is designed for use in all stored fuel, on-board tanks or storage cans. In ASTM oxidation tests Dyno-tab® fully stabilized fuel and out-performed a leading competitor.

ASTM D-873 Gum Formation Test

22.7	DYNO-TAB® Fuel Stabilizer
25.3	A Leading Liquid Competitor
169.1	Unprotected Fuel

Outperforms a Leading Competitor By 11.45%

For All Types and Grades of Gasoline and Diesel Fuel

Formulated for use in lawn mowers, snow mobiles, snow blowers, jet skis, farm equipment, chain saws, antique and vintage cars, motorcycles, portable generators and more.

Directions: Add one Dyno-tab® Fuel Stabilizer Tablet for each 2½ gallons treated. For extended protection, double the treat rate. SAFE to add one tablet to a lesser amount of fuel (one quart, for example). For best results, allow 7-10 minutes for tablet to dissolve, and then run engine for 3-5 minutes to fully disseminate treated fuel through delivery system.

KEEP AWAY FROM CHILDREN

WARNING: FLAMMABLE. Keep away from heat, flame and sparks.
HARMFUL IF SWALLOWED. If swallowed, drink 1 to 2 cups of water or milk and call physician immediately.
